

## FeedOS Developer Notice

### Handling the Tick Size Tables on Bolsa Madrid

<b>Notice Reference</b>	20101028
<b>Scope</b>	Referential data
<b>Exchanges</b>	Bolsa Madrid
<b>Effective Date</b>	2010-11-08
<b>Impact</b>	Referential data

Dear FeedOS developer,

Please be advised that starting the 2010-11-08, the dynamic tick size tables will be available on Bolsa Madrid in the referential data.

- The referential tag PriceIncrement\_dynamic\_TableId will be available, it will contain the dynamic tick size table identifier
- The “dynamic tick size tables” containing the price step will be created

You can download the “dynamic tick size tables” by using the tool “ref\_varticksize\_tables\_export” (available in the FeedOS toolbox) or equivalent API request: API\_REFERENTIAL\_GetVariablePriceIncrementTables.
