Effective Date	2011-04-22
Impact	New Quotation Context Tag

Dear FeedOS developer,

Please be advised that starting the 2011-04-22, the following quotation context tag will be disseminated in Level 1 data:

9356 = AggressorSide (type: char)

This tag is used to identify which side of a trade the aggressor was on and can have the following values:

Value	Description
" "	No aggressor, default value not sent
1	Buy Side
2	Sell Side

This tag will be sent among "Context" in the callback carrying Level1 event: notif_TradeEventExt()
