New LocalCodeStr for Nasdaq OMX TIP

Notice Reference	20110721
Scope	Referential Data
Exchanges	Nasdaq OMX TIP
Effective Date	2011-08-08
Impact	New LocalCodeStr

Dear FeedOS developer,

Please be advised that starting the 2011-08-08, the LocalCodeStr for all the OMX TIP instruments will change

The new LocalCodeStr will have the following format INDEX_YYY
For example the instrument LocalCodeStr will become XCSE@INDEX_444 instead of XCSE@I.137
Please notice that the instrument Internal Code & the fundamental characteristics (Symbol, ISIN, CFICode…) won't
won't change

NB: You need to reload the referential

BEFORE :

```
instr # 67/4946 = 140514130
    PriceCurrency              string{DKK}
    Symbol                     string{OMXC20}
    Description                string{OMX Copenhagen 20}
    SecurityType               string{NONE}
    FOSMarketId                XCSE
    CFICode                    string{MRIXXX}
    SecuritySubType            string{Securities}
    InternalCreationDate       Timestamp{2010-02-05 16:47:35:888}
    InternalModificationDate   Timestamp{2010-02-05 16:47:35:888}
    InternalSourceId           uint16{0}
    LocalCodeStr               string{I.137}
    ISIN                       string{DX0000001376}
```

AFTER :

```
instr # 67/4946 = 140514130
    PriceCurrency              string{DKK}
